## **The XCF Token project announces listing on the global crypto exchange, Bittrex Global.**

Gibraltar (Wednesday 30 March 2022) – The XCF Token project is proud to announce the listing of its XCF token (XCF) on the Bittrex Global exchange.

The XCF token (XCF) is a utility token for blockchain-enabled digital payments and green energy asset management created by Cenfura and managed by the XCF Token project. It is open for all to participate and build upon. Stakeholders can easily produce DApps (decentralized applications) or integrate their internal systems into the blockchain, using the XCF community and technology.

The XCF token (XCF) assists with managing decentralized energy - bringing in new business processes as well as faster and simpler transactions for management and payments. In addition, it helps build more efficient tools for multiple stakeholder management, and through these, brings transparency and trust to a fast changing energy industry.

The XCF token is currently being used by Cenfura as well as several other projects who are still in the implementation stage of business.

Pasi Nieminen, Founder and Lead of the XCF Token project said, “Bittrex Global exchange is the most secure digital asset exchange in the world, and an ideal place for the XCF token rollout. We are extremely happy to be working with the Bittrex Global team, and believe this is the next logical step to offering the XCF token to a much wider audience.”

## **About XCF Token Project**

The XCF Token project has created a utility token for blockchain-enabled digital payments and green energy asset management. The platform is open for all to participate and build upon.

The XCF Token project assists with managing decentralized energy - bringing in new business processes as well as faster and simpler transactions for management and payments. In addition, it helps build more efficient tools for multiple stakeholder management, and through these, brings transparency and trust to a fast changing energy industry. The project works to alleviate Energy poverty and works towards the United Nations Sustainable Development Goals.

The project was first formed in 2019, and was made an independent project in 2022, under Green Catalyst Ltd, based in Gibraltar.

### **About Bittrex Global**

Bittrex Global, the most secure digital asset exchange in the world, serves both retail and institutional clients, globally. Committed to helping users build wealth, Bittrex Global facilitates the purchase and trade of over 250 tokens.
